### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative Victor Wasylyna (Reg. 52345) on 10/16/06.

2. In the claims:

Claim 27, line 1, delete "operating"

#### ***Allowable Subject Matter***

3. Claims 1-36 are allowed.

The following is an examiner's statement of reasons for allowance:

Examiner has carefully considered the independent claims 1, 7, 12, 16, 20, and 32 and the Applicant's arguments filed 09/18/06.

Suzuki teaches a system for managing a computer from a host computer, comprising the generating a GUI for a printer for interfacing between a host processor of the computer and a user (column 1, lines 46-49); a data module containing an operating code for causing the printer to execute a predetermined action responsive to a computer command initiated at the GUI (Fig. 1, column 6, lines 38-43); and a conflict dialog module coupled to the data module and having a list of conflicts, the data module causing the conflict dialog module to generate

Art Unit: 2173

a conflict (error) from the list of conflicts responsive to a selected predetermined action to be executed by the host processor (col 2, lines 6-8; col 5, lines 52-64). However, Suzuki does not teach that GUI code is maintained independently of operating code by using separate modules. In fact, Suzuki teaches both the printer driver and the printer monitor include a graphic user interface ("GUI"). The printer driver GUI displays printer status data to the user and the printer monitor GUI displays printer errors or warnings. Sieffert teaches an imaging system in which the modular structure of the components allows the system to be modified to handle different imaging devices by swapping out components. Sieffert also does not teach GUI code that is maintained independently of operating code by using separate modules. Therefore, neither Suzuki nor Sieffert, alone or in combination, specifically teaches that GUI code is maintained independently of operating code by using separate modules such that the modification of GUI code does not affect other module(s), in specific combination as recited in the independent claims 1, 7, 12, 16, 20, and 32.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kieu D. Vu. The examiner can normally be reached on Mon - Thu from 7:00AM to 3:00PM at 571-272-4057.
